I am studying Electrical Engineering, but I also have strong knowledge of computers and am interested in software development, including both Front-end and Back-end, as well as UX/UI design. During my co-op project, I developed Full Stack applications for both Mobile and Web platforms independently.

Additionally, I gained experience in graphic design through my involvement in university clubs and organizations. I am disciplined and have excellent time management skills, which have helped me improve my technical abilities and achieve strong results.

EDUCATION

Kasetsart University

Bachelor of Engineering: Electrical Engineering. GPA 2.90

· Awarded First Place in the Student CWIE Category for Outstanding Project/Performance in Science and Technology

Bangkok, Thailand

June 2021 - April 2025

Thai-German Pre-Engineering School (KMUTNB)

Certificate in Technical Education: Pre-Civil Engineering.

Bangkok, Thailand

July 2016 - June 2019

PROJECTS

Metropolitan Electricity Authority

Co-Operative Education

Bangkok, Thailand

April 2024 - October 2024

Extra Project: Development of a Web Application for Monitor Garbage Truck Charging Stations and Data Analysis

- Developed a full stack web Application to monitor and analyze data from garbage truck charging stations.
- Utilized HTML, CSS, and JavaScript for the frontend, and Node.js with MySQL for backend development, enabling comprehensive and in-depth data analysis for efficient usage monitoring.

Project 2: Development of A Usage Monitor System for Electric Vehicle Charging Stations Aimed At Sustainable Energy Usage

- Developed a full stack application for monitor data from six types of electric vehicle charging stations on a single dashboard.
- Utilized Flutter And Dart for building a responsive user interface and Firebase for real-time data management, enabling station managers to efficiently monitor and analyze station performance.

Project 1: Development Of A Cross-Platform Device Control And Monitor System For Mobile And Web Application

- Developed a full stack application with four integrated systems for control and monitoring of IoT devices.
- Utilized Flutter and Dart for the mobile application, and HTML, CSS, and JavaScript for the web platform. Both platforms were integrated via Firebase to enable seamless smart home device management.

TECHNICAL SKILLS

Electrical Engineering:

C, Python, AutoCAD, Raspberry Pi Pico W, Arduino, MATLAB Simulink, PSpice

Programming/Full Stack:

Figma, HTML5, CSS3, JavaScript, Node.js, Flutter, Dart, MySQL, Firebase

Computer:

Adobe Photoshop, Adobe Illustrator, Microsoft Office, DaVinci Resolve, Procreate, Blender

Languages:

Thai (Native), English (Immediately)

Interests:

Youtube (Game Caster), Movies, Chess

ACTIVITIES

Singha Corporation Presents Teenage Fun

Graphic Department

Bangkok, Thailand

January 2024 – March 2024

Kasetsart University Student Administrative Board Bangkhen Campus

Visual Arts Department

Bangkok, Thailand

June 2022 – April 2023

Kasetsart Daily

Graphic Department

Bangkok, Thailand

December 2021 – April 2022

KU Balance Life Club

Graphic Department

Bangkok, Thailand

August 2021 – October 2021
