Summary

A self-motivated and multi-skilled developer with a background in programming, engineering, and 3D design. Always eager to learn new things and explore emerging technologies. Passionate about applying a wide range of self-taught skills to real-world projects, especially through the use of modern tools and technologies to create effective and practical.

Experience

Seagate Technology

Korat, Thailand

Software Engineer (Reliability Technology Engineer)

Aug 2025 - Present

- Developed Python-based tools and scripts to enhance HDD reliability testing and improve system performance.
- Optimized and maintained test software codebases, driving continuous improvement in reliability processes and reducing manual workload.
- Built full-stack web applications to support the engineering team, streamlining workflows and boosting operational productivity.

Education

Kasetsart University

Bangkok, Thailand

B.Eng. Electrical Engineering. GPA: 2.90

June 2021 - April 2025

Thai-German Pre-Engineering School (KMUTNB)

Bangkok, Thailand

Certificate in Technical Education: Pre-Civil Engineering.

July 2016 - June 2019

Projects

Metropolitan Electricity Authority

Bangkok, Thailand

Electric Power System Research and Innovation: Co-Operative Education Projects

April 2024 - October 2024

Extra Project 3: Development Of A Web Application For Monitor Garbage Truck Charging Stations And Data Analysis

- Developed a full stack web Application to monitor and analyze data from garbage truck charging stations.
- Utilized HTML, CSS, and JavaScript for the frontend, and Node.js with MySQL for backend development, enabling comprehensive and in-depth data analysis for efficient usage monitoring.

Assigned Project 2: Development Of A Usage Monitor System For Electric Vehicle Charging Stations Aimed At Sustainable Energy Usage

- Developed a full stack application for monitor data from six types of electric vehicle charging stations on a single dashboard.
- Utilized Flutter and Dart for building a responsive user interface and Firebase for real-time data management, enabling station managers to efficiently monitor and analyze station performance.

Project 1: Development Of A Cross-Platform Device Control And Monitor System For Mobile And Web Application

- Developed a full stack application with four integrated systems for control and monitoring of IoT devices.
- Utilized Flutter and Dart for the mobile application, and HTML, CSS, and JavaScript for the web platform. Both platforms were integrated via Firebase and employed MQTT protocol

Leadership & Activities

Council of Engineers Thailand (COE IDOL)

Bangkok, Thailand

Top 12 Engineering Communicator Finalist

July 2026

- Honorable Mention – Outstanding engineering communication and technical presentation skills.

Kasetsart University & CWIE

Bangkok, Thailand

Co-operative Education Contest (Science and Technology Category)

April 2025

- 1st Place – Outstanding Cooperative Education Student of the Year.
- 1st Place – Student CWIE Project Competition (Central–Southern Region).

Technical Skills

Engineering Tools: CATIA, AutoCAD, MATLAB Simulink, Altium, EasyEDA, LTspice, Microcontroller Board, Minitab, PLC

Programming Languages: JavaScript, Python, Dart, C

Frontend: React, HTML5, CSS3, Tailwind CSS, Flutter

Backend: Node.js, REST API, SQL, MySQL, Firebase, MQTT

Design & Multimedia: Adobe Photoshop, Figma, Microsoft Office, Power BI, DaVinci Resolve, Procreate, Blender

Languages: Thai (Native), English (Intermediate, TOEIC 685, CU-TEP 46)
